SMC Entry Logic	High Precision Order Blocks	Failed Liquidity Sweep Setup	1.12 Profit Factor

Steps to Save HTML Backtest Report & Graphs

Step 1: Open Strategy Tester Panel in MetaTrader 5

If the Strategy Tester panel at the bottom of your MetaTrader 5 window is closed or hidden, press `Ctrl + R` on your keyboard (or click **View** → **Strategy Tester**).

Step 2: Navigate to the Backtest Tab

Along the bottom tabs of the Strategy Tester section (next to *Overview*, *Settings*, and *Inputs*), click directly on the `Backtest` tab.

Step 3: Export the Report

- Right-click anywhere inside the performance data grid on the **Backtest** tab.
- Hover over **Report** in the contextual menu.
- Click **Open Report** (to automatically open in your web browser and save to temporary storage) OR click **Save as Report**.

Step 4: Save HTML File & Equity Chart Graphics

When selecting **Save as Report**:

- A file save dialog will open. Choose your preferred backup directory (e.g., Desktop or Documents).
- Set the file type as **Open XML (*.xml)** or **HTML Webpage (*.html)**.
- Click **Save**. MT5 will automatically generate the full interactive HTML file alongside PNG image files for the Equity/Balance graph, Drawdown chart, and Trade distribution graphs.

Note: Keep the saved HTML file and its associated PNG graph images in the same folder so that the graphical balance and equity charts render properly when opened in any browser.
